

### **CHAPTER-XIII** **Summary**

Model development plans for only two villages namely Akaniya and Bangwa have been prepared. Akaniya is a rehabilitated village situated between the Ganges and Burhi Gandak rivers in North Bihar (Khagaria District). While Bangwa is a village situated near Sone Canal in Ara district in South Bihar. The physical conditions of Akaniya widely differ with those of Bangwa. Though their model development plans have been prepared after extensive discussion with the villagers inhabiting these villages, still these do not cover approach between villagers owning land and those who are landless. The economic condition of inhabitants is based upon 10 percent sample of households and not after interviewing each families/households individually, residing in these villagers. Of course, report has been prepared after wide-ranging interaction with villagers residing in different tolas/hamlets within the village. Tolas means segregated but clustered households belonging to Scavengers, Doms, Chamars, Dusadhs, Kurmies, Koeries, Muslims, Yadavas, Rajputs, Baniyas, Brahmins etc.

Interaction with villagers of these villages lead us to conclude that basic requirement of economically deprived people are shelters and employment. Poverty makes the beneficiaries unable to make any investment on the upkeep of the Indira Awaas. Children are sent to schools even at the cost of their income to support the family. However parents require regular payment of the scholarship made available under government schemes. Public distribution system has yet to help all the persons living below poverty line. Coverage and delivery of foodgrains to BPL families are poor, Similar condition prevails in respect of members of Schedules Castes and Backward castes. Women feel the necessity of family planning measures, but utter absence of availability of relevant infrastructural facilities make them subservience to the desires of their males. Literacy and Adult education campaigns have influenced rise in literacy in villages. Mukhiyas and public spirited villagers have positive intention of helping implementation of development activities.

In our report suggestions have been made to tackle immediate problems. Steps which could influence the economic growth of villagers, like leather business etc. suggestions for helping women getting economically better of have also been made after interaction with the women, craftsmen etc of the two villages. However, detailed topographical survey with the assistance of cartographers could not be made in this report for projecting the locally available physical resources and how can they be augmented or improved upon.

Empowerment of Gram Sabha is essential for the success of grassroot democracy. It is essential therefore that all the elected representatives of PRIs are trained and attuned with their task of discharging their responsibilities 44815 females have been given responsibilities of being elected as representatives in the PRIs. A large number of them are members of Schedules Castes and of other Backward Classes. Many illiterate women have been elected absence of proper training to such females representatives is bound to make functioning of PRIs weak and ornamental.

Any model plan for village can be successfully implemented only with the involvement of PRI representatives. Vikas Samities of the villages constituted with male and female representatives of each castes residing in the village has to function as the executing arm of the Gram Sabhas.

Model Development Plans prepared for these two villagers, therefore, broadly indicate the requirements of these villages. They attempt to exploit locally available resources for their development through both voluntary & contributory methods besides augmentation of available finances by adopting various prudent and practical means.
